

New Water Solutions, Inc.

*presents:*

# *Pool Safety: From Construction to Technology*

A presentation focusing on new construction, highlighting techniques for building safer pools and spas. New pools and spas should be built with proper/sound hydraulics from the suction outlet(s) leading to the pumps. The importance of installing a Safety Vacuum Release System (SVRS), as well as starting with a safe flow rate through the open area of the anti-entrapment type suction outlet cover will be discussed. All to ensure a safe swimming pool and spa.

***Understand the system, protect your business, safe guard our children.***

## **SCHEDULE YOUR SESSION TODAY**

**This course is C.E. 1 hour credit  
in Michigan and Florida.**
